

Option to disable CSP headers (5.5)

2017-03-13 - Lauren Cumming - Comments (0) - Product

Under **Admin > Server > Server Settings** there is now a checkbox to disable CSP headers. CSP is enabled by default.

The screenshot shows the Admin Dashboard on the left with a sidebar menu. The 'Server' menu item is expanded, and 'Server Settings' is selected. The main content area displays the 'Server Settings' page. Under the 'Cookie Settings' section, there are input fields for 'Cookie Path' (containing '/') and 'Cookie Domain'. Under the 'Content Security Policy (CSP)' section, there is a checkbox labeled 'Disable CSP headers' which is currently unchecked.
