Customisable tab title Collecting Feedback

- Simon Frost
- **Forum name:** #Feature Request

We would like the ability to be able to customise the browser tab title (i.e. the html `<title>` tags) with variables, to be able to display information about the active Deskpro tabs.
For example, `Deskpro Agent Interface | {{Ticket Subject}} - {{Ticket Organization}}`
This should change depending on whichever tab is currently selected within Deskpro, so if we select a different tab, the `<title>` should update with the new information.
