Default

You are browsing the Legacy version of this article. For the current version, see: How do I remove the ability for users to change their password?

Question

The user portal offers users the ability to change their password- since we are syncing with AD, is there a way to disable that?

Answer

You can remove this from the 'Your Account' section by going to **Admin > User Interface > Portal > Templates > user/profiel.hmtl** and erasing the following code:

```
            </div>
        </div>
        {{ form_end(profile_form) }}
    </div>

    <div class="column-half divide-left omega">
        {{ form_start(password_form, { attr: { class: 'form-ticket' } }) }}
        {{ form_errors(password_form) }}
        {% if password_form.current_password is defined %}
            {{ form_row(password_form.current_password) }}
        {% endif %}
        {{ form_row(password_form.new_password) }}
        <div class="column-full">
            <div class="bucket">
                <button type="submit">{{ phrase('portal.account.change-password-btn') }}</button>
            </div>
        </div>
    {{ form_rest(password_form) }}
    {{ form_end(password_form) }}
    </div>
```
