DeskPRO Build #434 Released

2016-01-19 - Chris Padfield - Comments (0) - Release Announcements

We are pleased to announce a new release of the DeskPRO helpdesk platform, build #434.

The following is an automatically generated list of changes in this release:

- FIX Agent: (Regression) Custom fields with agent validation were always showing error message, even when validation should be satisfied.
- FIX Layout field custom criteria
- FIX Disable inline login form when DeskPRO usersource is disabled

We will begin rolling out this update to the Cloud soon. This post will be updated once all Cloud sites have been updated.

If you are using DeskPRO On-Premise, you can update your installation from the admin interface.
