

## Summing ticket charges

Ben Henley - 2023-03-06 - Komentarjev (0) - DPQL Examples

If you want to get the sum of all charges on a ticket, you can do this:

```
SELECT tickets.subject, DPQL_ALIAS(CONCAT(FLOOR(tickets.charges.charge_time / 3600), '
Hours ', FLOOR(MOD(SUM(tickets.charges.charge_time), 3600) / 60), ' mins'), 'Charge Time')
FROM tickets
GROUP BY tickets.id AS 'ID'
```
