

Updating Deskpro to the latest build

Christopher Nadeau - 2019-03-20 - Komentarjev (0) - Installation & Upgrades

If you're using Deskpro Cloud, we will automatically update your helpdesk for you. It usually takes a few days after a new build is announced in our [News section](#) for it to be rolled out to all Cloud sites.

If you are using Deskpro On-Premise, see the [Updating](#) section of the Sysadmin manual.

If you have a very old installation (v3 or earlier; i.e. you haven't updated for several years), see [Updating from V3](#), [Upgrade to #443](#) or Upgrade to [Deskpro v5](#)
