Deskpro Mobile App

Lara Proud - 2023-08-24 - Comments (0) - General

Deskpro's Mobile App is available on both iOS and Android.

The app lets Agents view, manage and reply to tickets in real-time and on the go, which links directly to your helpdesk.

Download the Deskpro app:

App Store | Google Play Store

In addition, Users on mobile devices can submit tickets via email or by using the simple ticket form on your Help Center. You can also embed our ticket submission form into a mobile-optimized website.
