Go to **Admin > Configuration > Phrase Translation**, then select the **Help Center UI** tab. Then you can type **"contact"** in the search box to quickly find the relevant phrases.

From here, you will want to search and click on the entry labeled `helpcenter.general.nav_contact`

**Phrase Translation** Help

The text you see in Deskpro is stored as phrases, that includes the names of custom object you create. Here you can manage the phrases and provide translation for custom phrases.

Phrase	English	Customized?
<b>Help Center Error (2)</b>		
helpcenter.error.contact	If you feel that this is an error, please <b>contact</b> us.	
helpcenter.error.contact_us	<b>Contact Us</b>	
<b>Help Center General (2)</b>		
helpcenter.general.nav_contact	<b>Contact Us</b>	
helpcenter.general.nav_contact_desc	Get in touch for help	

A menu will open that will let you change your phrase on the right-hand side, then click save.
