

I'm having trouble receiving notification emails when I create a ticket

Ben Henley - 2018-03-13 - Comments (0) - Using Deskpro

Question:

I'm trying to test email notifications. I make myself a test ticket and I don't get an email. Other automatic emails seem to be working. What's wrong?

Answer:

By default, you don't get notifications about your own actions on tickets, including creating them.

The screenshot shows the 'Ticket Notifications' settings page in Deskpro. The page is divided into several sections: 'Inbox', 'Filters', 'My Events', and 'Notes with @mentions'. The 'My Events' section is highlighted with a red box. It contains a table with columns for 'All Actions' and 'Forwards'. The 'My Own Actions' row has an unchecked checkbox under 'All Actions'.

	All Actions	Forwards
My Own Actions	<input type="checkbox"/>	<input type="checkbox"/>

Notes with @mentions
How do you want to be notified when an agent mentions you in a ticket note?
Always email and send a message via Agent IM

If you want to enable email notifications for your own actions, go to your **Preferences** at the top left of the agent interface, and change the **My Own Actions** settings under **Email Notifications**.
