We're delighted to announce the release of Deskpro 5.13

Deskpro 5.13 includes the feature updates, improvements, and bug fixes listed below:

Chat Round Robin

- Automatically and evenly distribute live chats to agents based upon criteria that you determine. Find out more about Chat Round Robin [here](#).

Apps & Integrations

- We have released two new brand new applications to further power your helpdesk
 - Custom HTML
 - Custom JS
- Further improvements have been made to the following Deskpro apps and integrations
 - [Trello](#)
 - [Zapier](#)

Improvements

- Dates associated with downloadable resources are now based upon the latest upload of that resource, rather than the date of the original post.
- New API command added to clear all current sessions the user has open, logging them out of the helpdesk:
 - `POST /people/{id}/sessions/clear`

Bug Fixes

- Escalations based on usergroup criteria now working correctly
- Email addresses now displaying correctly after a user search
- After updating user avatars, old avatar data is now deleted
- Blank CSV export bug issues resolved
- Initial Deskpro set up and licensing no longer generating errors
- Bug when chat turns off at random has been resolved
- Using arrow keys in chat no longer affects the display of previews
- Bug causing the contents of the chat window to erase when using the arrow keys
- Bugs causing errors in Follow Ups related to permissions settings are now

fixed
