

Creating Effective Custom New Ticket Contact Forms

Lara Proud - 2023-08-21 - [Kommentarer \(0\)](#) - [Admin](#)

What is a Ticket Contact Form?

A ticket contact form is a default feature on your Help Center; it is the principal channel users can use to submit tickets to your helpdesk.

Ticket forms can be embedded onto any of your web pages, and appear on your Help Center. You can create different custom Contact forms for each department; this ensures that your Agents have all the relevant information about an inquiry when a ticket gets submitted. But you can also have the same form for multiple departments if you wish.

How do I create effective Ticket Contact Forms?

The key to making an effective contact form is by making the most of Deskpro's built-in form fields as well as creating your own custom fields, this will enable you to collect information from your users before the ticket reaches your Agents.

Think of form fields as a supplement to email support, providing as much information about specific inquiries will help your Agents to solve issues faster and reduce the back-and-forth required to resolve an issue.

You can create custom fields by going to **Admin > Ticket Structure > Ticket Fields**.

Name	Field Type	User Forms	Agent Forms	ID
Toggle	Toggle			31
Priority	Select Field			49
Type of product	Single-line Text			48
Any further comm...	Multi-line Text			47
Opening times	Display			46
URL Field	Url			41
File Field	File			40
Checkbox Field	Select Field			36
Radio Buttons Field	Select Field			32

Once you have created your custom fields, you can create your **Ticket Contact Forms**. You create Ticket Contact Forms for your Departments in **Admin > Ticket Structure > Departments**.

Select the department you require, and then open the **Form** tab where you can build your Ticket Contact Form by adding fields and ordering them using the handy drag-and-drop functionality.

Edit: Complaints

Information Permissions **Form** Website Embed

Form

Custom Form Editor

This is a custom layout that applies only to this department. Any changes you make to this layout will not affect any others.

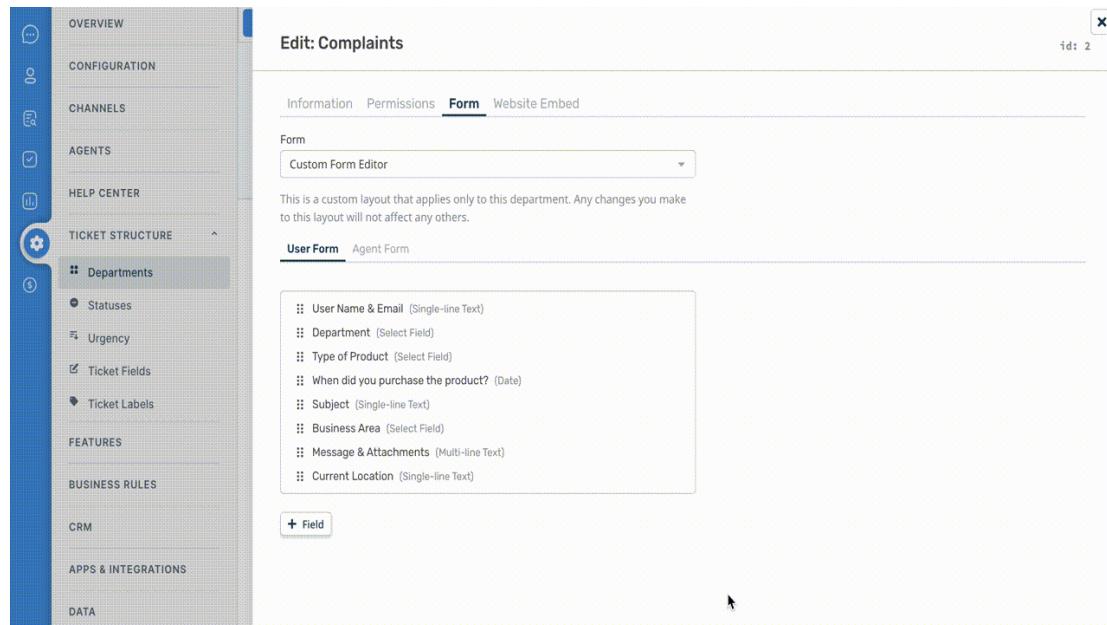

User Form Agent Form

- :: User Name & Email (Single-line Text)
- :: Department (Select Field)
- :: Subject (Single-line Text)
- :: Business Area (Select Field)
- :: Message & Attachments (Multi-line Text)
- :: Current Location (Single-line Text)

+ Field

You can add as many custom fields as you need. You can also create dependencies between fields for truly dynamic forms, e.g., only when a User selects that their 'Type of Product' is a 'Radiator' that 'When did you purchase the product?' appears.

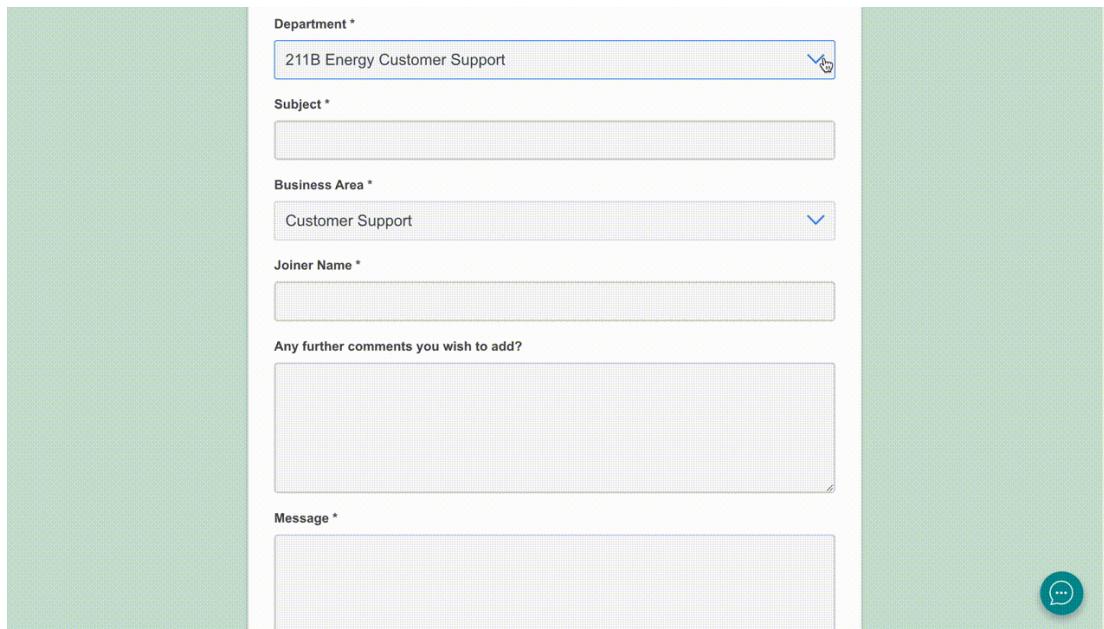

Add field dependencies by selecting the **Cog** on a field and specifying the criteria; you can edit other advanced settings here.

The screenshot shows the 'Edit: Complaints' configuration page. On the left, a vertical sidebar menu lists various sections: OVERVIEW, CONFIGURATION, CHANNELS, AGENTS, HELP CENTER, TICKET STRUCTURE (expanded to show Departments, Statuses, Urgency, Ticket Fields, and Ticket Labels), FEATURES, BUSINESS RULES, CRM, APPS & INTEGRATIONS, and DATA. The TICKET STRUCTURE section is currently selected. The main content area displays the 'Edit: Complaints' page with the following structure:

- Header: Edit: Complaints, id: 2, X button.
- Top navigation: Information, Permissions, **Form** (selected), Website Embed.
- Form title: Custom Form Editor.
- Text: This is a custom layout that applies only to this department. Any changes you make to this layout will not affect any others.
- Form tabs: **User Form** (selected) and Agent Form.
- Form content area:
 - List of fields: User Name & Email (Single-line Text), Department (Select Field), Subject (Single-line Text), Business Area (Select Field), Message & Attachments (Multi-line Text), Current Location (Single-line Text).
 - Button: + Field.

Once you save your form, you can go to your Help Center and see the changes live by clicking on **Contact Us** and testing out the new fields you have created:

Department *
211B Energy Customer Support

Subject *

Business Area *
Customer Support

Joiner Name *

Any further comments you wish to add?

Message *

What are Agent Ticket Forms?

In the Agent interface, the fields that Users fill in when submitting a ticket will be displayed to the Agent on the individual ticket as an **Agent Ticket Form** in the **ticket properties panel**, so they have all the information available to them as they handle the ticket.

You will need to edit the **Agent Form** in **Admin > Ticket Structure > Departments** so that any custom fields you create are visible on the ticket for an Agent.

The screenshot shows a ticket management interface with the following details:

- Header:** My radiator i... (david.green@m...)
- Ticket Summary:** My radiator is faulty
- Ticket Status:** Awaiting Agent (1)
- Ticket Details:**
 - Unassign, Team (C), Followers
 - 13 mins Next event, 57 secs Ticket Open, 57 secs User Waiting
 - David Green (david.green@mail.com)
 - Ref: MUWF-2400-XMCK
 - Brand: 221B Energy
 - Department*: Complaints
 - Language: English
 - Business Area: Customer Support
 - Type of Product: Radiator
 - When did you purchase ...: 28 December 2021
- Message Form:**
 - FORM (DG David Green)
 - Message: Please could you help my radiator isn't working properly!
 - IP: 217.138.85.210 2 mins #1
- Message Area:**
 - Email, Note
 - Write a message...
 - Icons: trash, reply, forward, close, print
- Action Buttons:**
 - Send as: Awaiting User (dropdown)
 - Agent, Team (C), Macro
 - Close tab after email sent

Agents can edit or update the information provided in the ticket by clicking on a field; this is helpful if a User has accidentally put the wrong information down and helps to keep all records up to date.

In addition to Ticket Custom Fields, you can create custom User and Organization fields that can add and store additional information about them in your CRM.
