New Feature: Click-to-edit fields on tickets

2017-01-17 - Lauren Cumming - [Kommentarer \(0\)](#) - [Product](#)

We are always looking for ways to improve your experience with Deskpro in terms of making it more user-friendly. This is why we have introduced 'Click-to-edit' fields on tickets. You can now simply click on any field in your ticket properties box, such as Workflow or Category, and edit it straight away. Click on a field, edit it and press save at the bottom to make a change. You don't have to click on the gear to make fields editable anymore which is a great time saver and makes this process a lot more effortless.

The screenshot shows the 'PROPERTIES' tab of a ticket in Deskpro. At the top, there are tabs for 'LINKED TICKETS (3)', 'TASKS (0)', and 'SLAS'. Below this, the 'Agent' is set to 'Unassign' with a dropdown menu showing 'John Doe'. The 'Team' is set to 'None' with a dropdown menu. The 'Followers' section shows 'Add Me' and a button to 'Add a follower'. There are sections for 'Labels' (with 'Add a label' button), 'Language' (set to 'English'), 'Which option applies?', 'What date is this for?', and 'Please add your recommendations:'. Below the properties is a toolbar with 'Lock', 'Merge', 'Macros', 'Remove', and 'Actions'. At the bottom, there is a 'REPLY' and 'NOTE' section with a rich text editor toolbar containing 'Attach', 'Snippets', 'B', 'I', 'U', 'List', 'Link', 'Table', 'Image', 'Code', and 'X'.
