Deskpro

Email Templates - Layout - table break Finished

- Sergey Popov
- **Forum adı:** #Bug Report

If there is a very complex email template with multiple nested tables - and if I split it into 2 parts and insert it to Header/Footer email templates, it gets broken.

It seems that Deskpro inserts its owntags before the footer.

Hi Sergey, I'm just reaching out as we are doing a review of open bug reports in Deskpro since the release of Deskpro Horizon. I've taken a look into this issue and this is fixed in Horizon. I'm very sorry for the delay in providing an update here. Do reach out via our [webform](#) if you are still experiencing any issues.
