Can I let Users log in to Deskpro using existing accounts from other systems?

David Anjonrin-Ohu - 2023-08-29 - [Yorumlar (0)](#) - [CRM](#)

If your users already have accounts on your website, you can link those accounts to Deskpro, so they don't have to create a separate Deskpro account.

There are several ways to implement this using Deskpro authentication apps, found at **Admin > CRM > User Auth & SSO**.

Deskpro allows you to get credentials from several services like [Active Directory](#), [LDAP](#), and social platforms like Facebook, Twitter, and Google. Or use the [JWT](#) or [SAML](#) standards to let users sign in with their existing accounts.
