

How do I set up a new user registration form?

Manu Marquez - 2023-09-08 - Yorumlar (0) - Ticket Structure

Some organizations need new users to complete a form to provide information, agree to network policies, etc.

This article explains how you can implement this in Deskpro so that users can submit a ticket form and all the information is added directly to their profiles. We'll also demonstrate how to embed a form to collect information from new users.

1. Go to **Admin > CRM > Fields > User Fields**. Click “New” to create a new Custom Field.

The screenshot shows the Deskpro Admin interface. The left sidebar is expanded to show the 'User Fields' section, which is highlighted with a red arrow labeled '1'. The main content area displays the 'User Fields' configuration page. At the top right of the main content area, there is a '+ New' button, which is highlighted with a red arrow labeled '2'. Below the header, there is a search bar and a filter dropdown. The main content area contains a table with the following columns: Name, Field Type, and ID. The table lists various field types and their corresponding IDs.

Name	Field Type	ID
Select	Select Field	1
Multiselect	Select Field	5
Date	Date	9
DateTime	Date & Time	10
Textarea	Multi-line Text	11
Toggle people field	Toggle	12
Currency people field	Currency	13

Choose a field from the list provided, and click **Configure Field**. For this example, we are going to use a toggle to record that the user agreed to your network policy.

on and new ticket forms.

Help

Add: New Field

- Single-line Text**
A single-line input box that the user can type into.
- Number**
Allows users to enter a numeric value.
- Multi-line Text**
A multi-line input box that the user can type into.
- Select Field**
Present predefined options to user as a drop-down, radio button or checkbox menu.
- Toggle**
This field displays as a single checkbox.
- Date**
Date Field lets user select a date using the calendar widget.
- Date & Time**
Date & Time field lets user select a date & time using the calendar widget.
- Display**
This field does not take input, instead displays the HTML entered by you the administrator.
- Hidden**
This is a hidden field in the new-ticket form with no visible UI for a user to interact with. The value can come from a cookie or a query string parameter, or you can use custom Javascript in your templates to set the field dynamically. The field is still editable in the agent interface via a text box.
- URL**

2. Go to **Admin > Ticket Structure > Departments** and create a new department called New Users.

3. In the **Form** tab, select **Custom Form Editor**.

4. Click on the **+ Field** button to add your newly created Toggle field — type the name of your field to find it in the provided list:

Add: New Ticket Department ✕

Cancel

6. You could set up a trigger so that, if users haven't agreed to the network policy when submitting a ticket to any other department than "New Users", they get an automatic email reminder to fill in the new user form. You'll need to create a new email template for this reminder.

Add: New Trigger ✕

3 Criteria

The criteria section is a list of terms that must match before the actions are applied to the Ticket.

When the following conditions are met:

	Department	is not	New Users	✕	🗑️	+
And	I agree to your Network Policy	Is not set			🗑️	+

Or when the following conditions are met:

	Select...	Select...			🗑️	+
--	-----------	-----------	--	--	----	---

4 Actions

These actions will apply when all of the criteria pass.

Then the following actions will run

	Send email to user	
Templates	Templates	🔍 Edit temp...
To	Email only ticket owner	🗑️
From name	Helpdesk name	🗑️
From email	The account set on the ticket	🗑️

Add headers

Create **Cancel**
