Number of times Files have been downloaded from the Help Center

Matthew Wray - 2023-09-08 - Yorumlar (0) - Reports

If you want to track how many times your Files have been downloaded from the Help Center, you can build a custom report to generate this information. Go to **Reports > Stats > Create Statistic.** Enter a title for your report and the following query:

```
SELECT downloads.id, downloads.date_created, downloads.title, downloads.num_downloads
FROM downloads
ORDER BY downloads.num_downloads
```

You can also add downloads.num_ratings to the SELECT line if you want to see the number of ratings per File too.
