Deskpro Horizon Release 2022.19.0

2022-05-10 - James Godwin - Yorumlar (0) - Deskpro Releases

We are delighted to announce the latest release of Deskpro Horizon, included are the following improvements:

- SC 64799 - Improved labels and descriptions of the settings in admin that allow agents as followers in CC fields.

- SC 71261 - Allow agents to see department fields even if they don't have permission for this department because they are an owner, team member, or follower of the ticket.

- SC 69427 - Fixed community topic approvement when submission validation is enabled.

- SC 69035 - Outbound email is now auto-populated when creating an email in the admin channels section.

- SC 61566 - Fixed where Macro was applying when it should be applied as Follow Up action.

- SC 68440 - Custom fields drawers:

    - Fixes for validation flags, to save and retrieve correct values.

    - Input spacing improved.

    - Added correct error states.

- SC 69512 - Secure user password reset by not leaking whether the address exists or not.

- SC 70641 - Fixed a bug in search where internal query conditions were not handled correctly. These changes will make the search produce more relevant results.

- SC 56757 - Improved information about the current build version.

- SC 70845 - Fixed typo in queue name 'Stared' -> 'Starred'.

- SC 71290 - Unassigned sub-queue has been added back when grouping by agent.

- SC 70853 - Use existing config for serving /app page.

- SC 71299 - Fixed regression where unassigned tickets were not getting auto-assigned when the auto-assign on unassigned feature was enabled for ticket replies.

- SC 70861 - Fixed incorrect validation errors for Queues criteria, namely label and SLA criteria when a picked label or SLA is not required.

- SC 65494 - Fix SSO for agents.

- SC 70489 - Improved v5 migrations:

  - Fixed where ticket 'Saved Lists' were showing duplications in some cases.

  - Fix errors in admin in some configurations of ticket trigger criteria/actions where some toggle options were off.

- SC 71145 - Fixed display of agent team avatar.

- SC 71264 - Change how CSP directives are constructed for development environments.

- SC 71245 - "Improve spelling for the Last logged in message on the Admin Dashboard".

- SC 65499 - Fixed incorrectly displayed override name in the message history section.

- SC 66699 - Record delete actions for Emails, Notes, Chats, and Voice messages in the Ticket message history log.

- SC 58967 - Fix agent comments validation when users' permissions don't require it.

- SC 69094 - Limit Twitter message import attempts to once per minute.

- SC 50248 - Admin. Branding page. Added ability to show only https:// options for the Helpdesk URL dropdown when BE is providing URL as both http:// & https://.

- SC 71263 - Fix empty drafts being displayed on tickets.

- SC 70532 - The Macro button in the ticket actions menu has been fixed.

- SC 44156 - Published old v1/v2 API docs on the website.

- SC 46539 - Permissions - Mass Actions: UI shows mass action errors.

- SC 49755 - Internet Explorer 11- Show a please use another browser.

- SC 58677 - File Custom Field Bugs.

- SC 59744 - COMMENTS - All comments counts do not take into account unpublished comment count.

- SC 61270 - Time in billing & time log not editable.

- SC 63223 - Twitter: Tweet metrics.

- SC 64046 - REPORTS - table widgets on the Dashboard page selector does not appear.

- SC 64090 - Agent Teams: showing deleted agents in the table.
