Language sync

2019-01-09 - Emily Booth - [Yorumlar \(0\)](#) - [Product](#)

Included in [Deskpro 2019.1](#) is the release of the latest update to [language](#) feature on Deskpro. This update will now allow your admins to easily and quickly update your installed language packs.

This is done very easily with only a couple of clicks by heading to Setup > Languages and 'Settings & Tools' at the bottom of this page. You will see our new addition at the bottom of the page with a simple drop-down box to select the language that you wish to update or simply update all installed languages, and then press the button 'Download latest language'.

The screenshot shows the Deskpro admin interface. On the left is a navigation sidebar with options like Admin Dashboard, Setup, Settings, Automatic Updater, Rate Limiting, Email Rate Limiting, CAPTCHA Settings, Languages, Reset Helpdesk, Agents, Tickets, Emails, CRM, User interface, Chat, Apps, Tasks, Server, and Dev. The main content area is titled 'Languages' and contains several sections:

- Language Settings:** Includes checkboxes for 'Automatically install new languages' and 'Auto-detect language on emails from new users'. A 'Save' button is at the bottom right.
- Mass update ticket language:** Features a dropdown for 'Update all' (currently 'no language') and a dropdown for 'and set the language to' (currently 'English'). A 'Mass-update tickets now' button is at the bottom right.
- Mass update user language choice:** Features a dropdown for 'Update all' (currently 'no language') and a dropdown for 'and set their language to' (currently 'English'). A 'Mass-update users now' button is at the bottom right.
- Download latest language:** Features a dropdown menu labeled 'Download the latest language for' with '(all languages)' selected. A red box highlights this dropdown. Below it are two buttons: 'Download latest language' (pointed to by a red arrow) and 'Reset phrases'.

This will be especially useful for anyone currently contributing to the languages packs, but everyone who is using an installed language pack can also visit this page to check on any updates.
