## New Chat Widget colors available

2017-05-30 - Zara Marchesi - [Yorumlar \(0\)](#) - [Product](#)

You can now set colors for the Chat Widget itself, allowing you to customize this feature even more!

### How do I set the color?

Simply go into Admin > Chat > Site Widget & Chat, and customize your colors!

The screenshot displays the 'Site Widget & Chat' configuration interface. On the left, the 'Button settings' section is expanded, showing options for 'Label' (set to 'Click for help'), 'Size' (set to 'Medium'), and 'Colors'. The 'Colors' section includes a 'Background color' color picker with a red swatch selected, a color selection tool, and a text input field containing the hex code '#e60300'. Below the color picker are options for 'Column' and 'Left' placement. The right side of the interface shows a preview of the chat widget on a website. The preview includes a 'Google' logo, a search bar, and a chat window with a 'Flexforce' header. The chat window shows a 'Sample question' and a 'Sample answer'. A red 'Click for help' button is visible at the bottom right of the chat widget. A black arrow points from the '#e60300' hex code in the settings to the 'Click for help' button in the preview.
