Allow true search of feedback categories at feedback page Finished

- Ian Clayton
- **Forum name:** #Feature Request

The feedback home page includes a tabbed prompt for 'category' is in fact feedback 'type'.I have a need to allow my users to view the actual categories as setup in the admin panel - which in my case each represent a product offered. Can we add this feature please and at the very least reword the tabbed prompt so it says 'type' and is not misleading....
