Custom from and to dates in reports dashboards Collecting Feedback

With the new dashboards, it would be helpful to allow specific dates to be chosen as from and to dates, in addition to built in date ranges.

For example, our "year" runs from September -> August, not January to December, so it would be very useful for us to report on Sept. 1st, 2017 to August 31st 2018, instead of "This Year" or "Last Year".

While this is possible to do by editing a query from inside of the stat builder, it would be much simpler to do with date pickers for start and end dates.
