How can I see which tickets have been resolved by only one agent?

Benedict Sycamore - 2023-08-01 - Comments (0) - Deskpro Legacy

For a number of purposes, you may want to generate a report that shows a list of resolved tickets ordered by the number of agents who have replied or added a note to that ticket. Simply enter these queries into the query builder when creating a custom report in the reporting interface:

SELECT DPQL_COUNT_DISTINCT(tickets_messages.person) AS 'Number of agents', tickets_messages.ticket_id, tickets_messages.ticket
FROM tickets messages

 $\label{linear_messages} Where \ tickets_messages. ticket.status = "resolved" \\ GROUP BY \ tickets_messages. ticket_id$

ORDER BY DPQL_COUNT_DISTINCT(tickets_messages.person)

This will generate a report that shows a list of resolved tickets ordered by the number of agents who have replied or added a note to that ticket.

For more information on creating reports, refer to our guide on the <u>Anatomy of a DPQL</u> <u>Query</u>.
