If your agents are using the CRM app to record which users are managers of their organizations, you could use this information to increase the urgency of managers' tickets:

The screenshot shows the configuration interface for a trigger in Deskpro Legacy. It is divided into three main sections: Title, Event, and Criteria/Actions.

- Title:** A text field contains "RHIP". Below it, a note states: "This title will be used throughout the admin interface to refer to this trigger."
- Event:** A section titled "When a new ticket is created" with two columns of checkboxes.
 - By a user:** ☒ By a user

- Criteria:** A section with two criteria added.
 - when:** "The following conditions are met:"
 - Is manager of organization
 - or:** "The following conditions are met:"
 - Usergroup is
- Actions:** A section with two actions added.
 - then:** "The followings actions will run:"
 - Set Priority:
 - Set Urgency:

A "Save" button is located at the bottom right of the configuration area.

Note that the trigger makes the ticket more urgent if the user is a manager, or belongs to the VIPs usergroup. It increases the urgency by 5, up to a maximum of 10.
