

Added Hijri calendar (Arabic) for custom date fields (5.5)

2017-03-13 - Lauren Cumming - Comments (0) - Product

You can now choose between the option to use a Gregorian or Arabic calendar for custom date fields.

The screenshot shows the Deskpro configuration interface for a widget. At the top, there are fields for 'Agent' (John Doe), 'Team' (None), and 'Followers' (Broderick Mori). Below these are 'Labels' (bartell inc, bayer-o'kon, flatley-bednar, hahn ltd, kessler) and 'Language' (French). A 'New Calendar' field is present but empty. A modal window is open over the 'Widget Type' field, displaying a Hijri calendar for the month of Jumada al-Akhir (جمادى الآخر) 1438. The calendar grid shows days of the week (ن, ث, ر, خ, ج, ع, ح) and dates from 1 to 28. The date 11 is highlighted. Navigation arrows are visible at the top of the calendar, and 'إغلاق' (Close) and 'موافق' (OK) buttons are at the bottom. The background interface shows a 'Save' and 'Cancel' button at the bottom right.
