## Deskpro Horizon Release 2022.19.0

2022-05-10 - James Godwin - Comments (0) - Release Announcements

We are delighted to announce the latest release of Deskpro Horizon, included are the following improvements:

- SC 64799 Improved labels and descriptions of the settings in admin that allow agents as followers in CC fields.
- SC 71261 Allow agents to see department fields even if they don't have permission for this department because they are an owner, team member, or follower of the ticket.
- SC 69427 Fixed community topic approvement when submission validation is enabled.
- SC 69035 Outbound email is now auto-populated when creating an email in the admin channels section.
- SC 61566 Fixed where Macro was applying when it should be applied as Follow Up action.
- SC 68440 Custom fields drawers:
  - $\circ~$  Fixes for validation flags, to save and retrieve correct values.
  - Input spacing improved.
  - Added correct error states.
- SC 69512 Secure user password reset by not leaking whether the address exists or not.
- SC 70641 Fixed a bug in search where internal query conditions were not handled correctly. These changes will make the search produce more relevant results.
- SC 56757 Improved information about the current build version.
- SC 70845 Fixed typo in queue name 'Stared' -> 'Starred'.
- SC 71290 Unassigned sub-queue has been added back when grouping by agent.
- SC 70853 Use existing config for serving /app page.
- SC 71299 Fixed regression where unassigned tickets were not getting auto-

assigned when the auto-assign on unassigned feature was enabled for ticket replies.

- SC 70861 Fixed incorrect validation errors for Queues criteria, namely label and SLA criteria when a picked label or SLA is not required.
- SC 65494 Fix SSO for agents.
- SC 70489 Improved v5 migrations:
  - $\circ~$  Fixed where ticket 'Saved Lists' were showing duplications in some cases.
  - Fix errors in admin in some configurations of ticket trigger criteria/actions where some toggle options were off.
