Ability to view each ticket that used a particular snippet in "snippet reporting" Finished

- J Jason
- 论坛名称: #Feature Request

Would it be possible to add links to the snippet reporting feature so we can easily see the tickets where the snippets were used?

The following report should allow you to do this :)
DISPLAY TABLE SELECT
OBJ_LANG(ticket_object_use_logs.snippet.category.id, 'text_snippet_categories') AS 'Snippet Category',
OBJ_LANG(ticket_object_use_logs.snippet.id, 'text_snippets') AS 'Snippet', COUNT() AS 'Uses' FROM
ticket_object_use_logs WHERE ticket_object_use_logs.snippet.id <> NULL AND
ticket_object_use_logs.date_created = %1:DATE_GROUP% SPLIT BY ticket_object_use_logs.snippet.id GROUP
BY ticket_object_use_logs.ticket.id ORDER BY COUNT() DESC
