The ability to choose which reports display in the reports interface homepage Finished

- Amanda
- 论坛名称: #Feature Request

It would be really nice to customise which reports display on the main homepage of the reports interface. For our purposes, some of the built-in reports are less useful and we have created a number of custom reports. It would be really nice if we could display them on the main homepage instead of the default ones and choose where they are aligned on the page. Thanks!
