

Can I use Deskpro automation for integration with JIRA?

Ben Henley - 2017-11-09 - Comments (0) - Using Deskpro

The updated JIRA integration app adds support for creating triggers that respond to JIRA events and create comments within JIRA.

To enable these, you must [install the latest JIRA app](#). (If you are on Deskpro On-Premise and are running build #383 or earlier, you must first update your helpdesk).

You will find JIRA events filter settings under the **By an app** category.

- By an app
 -  Linked JIRA issue was updated
 -  Linked JIRA issue was deleted

You will be able to use the following criteria for triggers:

JIRA
New JIRA Comment
Issue Status
New Linked Issue

There will also be an automation action to add a JIRA comment to all linked issues on a ticket.

	Author:	<input type="checkbox"/> Use the assigned agent if there is one 
		<input checked="" type="radio"/> Head of Support
Add JIRA Comment	Text:	<div style="border: 1px solid #ccc; height: 80px;"></div>
<div style="background-color: #00a651; color: white; padding: 5px; display: inline-block;"> Action</div>
