Note

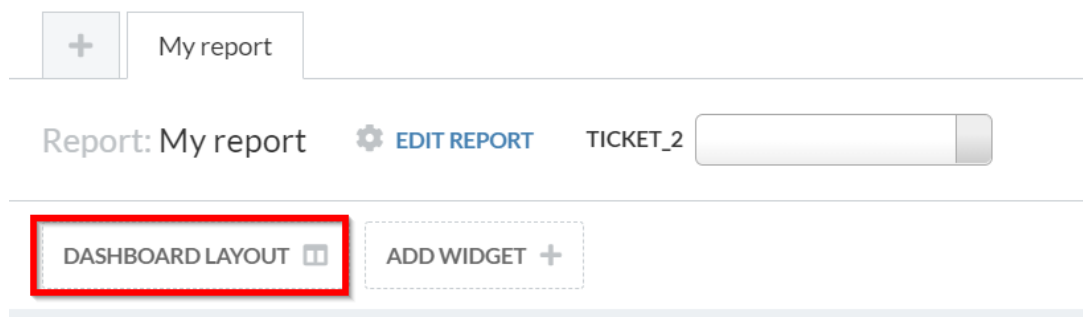

You are browsing the Legacy version of this article. For the current version, see:

[Customising colour of charts on report custom dashboards](#)

Colour customisation can be done on all types of charts in the Custom Dashboards following the the steps below.

Note: this customisation can only be done on charts in the Custom Dashboards, not the Built-in dashboards.

1. Select a Custom Dashboard.
2. Select Dashboard Layout

The screenshot shows a user interface for a custom dashboard. At the top, there is a navigation bar with a '+' icon and the text 'My report'. Below this, the main header area displays 'Report: My report' followed by a gear icon and the text 'EDIT REPORT'. To the right of this is a search bar containing the text 'TICKET_2'. Below the header, there are two buttons: 'DASHBOARD LAYOUT' (with a grid icon) and 'ADD WIDGET' (with a plus icon). The 'DASHBOARD LAYOUT' button is highlighted with a red rectangular border.
