

How can I see which tickets have been resolved by only one agent?

Benedict Sycamore - 2023-08-01 - Comments (0) - Deskpro Legacy

For a number of purposes, you may want to generate a report that shows a list of resolved tickets ordered by the number of agents who have replied or added a note to that ticket. Simply enter these queries into the query builder when creating a custom report in the reporting interface:

```
SELECT DPQL_COUNT_DISTINCT(tickets_messages.person) AS 'Number of agents',  
tickets_messages.ticket_id, tickets_messages.ticket  
FROM tickets_messages  
WHERE tickets_messages.person.is_agent AND tickets_messages.ticket.status = 'resolved'  
GROUP BY tickets_messages.ticket_id  
ORDER BY DPQL_COUNT_DISTINCT(tickets_messages.person)
```

This will generate a report that shows a list of resolved tickets ordered by the number of agents who have replied or added a note to that ticket.

For more information on creating reports, refer to our guide on the [Anatomy of a DPQL Query](#).
