

## How do I automatically increase ticket urgency on tickets from organization managers?

Ben Henley - 2023-08-31 - Comments (0) - Deskpro Legacy

If your agents are using the CRM app to record which users are managers of their organizations, you could use this information to increase the urgency of managers' tickets:

The screenshot shows the configuration interface for a trigger rule in Deskpro Legacy. It is divided into several sections:

- Title \***: A text input field containing "RHIP". Below it, a note states: "This title will be used throughout the admin interface to refer to this trigger."
- Event**: A dropdown menu set to "When a new ticket is created". Below this, there are two columns of checkboxes:
  - By a user**:
    - via the web
    - via email
    - via the API
  - By an agent**:
    - via the agent interface
    - via email
    - via the API
- Criteria**: A section with two criteria:
  - when**: "The following conditions are met:"
    - Is manager of organization
  - or**: "The following conditions are met:"
    - Usergroup is
- Actions**: A section with two actions:
  - then**: "The followings actions will run:"
    - Set Priority:
    - Set Urgency:

At the bottom of the form is a blue "Save" button.

Note that the trigger makes the ticket more urgent if the user is a manager, or belongs to the VIPs usergroup. It increases the urgency by 5, up to a maximum of 10.
