

## Added Hijri calendar (Arabic) for custom date fields (5.5)

2017-03-13 - Lauren Cumming - Comments (0) - Product

You can now choose between the option to use a Gregorian or Arabic calendar for custom date fields.

The screenshot shows the Deskpro interface with a date picker open. The date picker is for the Hijri calendar (Arabic) and displays the date 11 of the month of Jumadil Akhir, 1438. The date picker is overlaid on a form that includes fields for Agent (John Doe), Team (None), Followers (Broderick Mori), Labels (bartell inc, bayer-o'kon, flatley-bednar, hahn ltd, kessler), Language (French), and a New Calendar field. The date picker has a grid with columns for days of the week (ن, ث, ر, خ, ج, م, ح) and rows for dates. The date 11 is highlighted in blue. The date picker also shows the year 1438 and the month Jumadil Akhir. The date picker has a close button (إغلاق) and a save button (Save).

Widget Type	جمادى الآخر 1438						
Widget Description	ن	ث	ر	خ	ج	م	ح
Desired Sizes	1	2	3	4	5	6	7
Manufacture Date	8	9	10	11	12	13	14
