

## Added Hijri calendar (Arabic) for custom date fields (5.5)

2017-03-13 - Lauren Cumming - Comments (0) - Product

You can now choose between the option to use a Gregorian or Arabic calendar for custom date fields.

The screenshot shows the Deskpro interface with a widget configuration window open. The window includes fields for Agent (John Doe), Team (None), and Followers (Broderick Mori). Below these are labels for various companies (bartell inc, bayer-o'kon, flatley-bednar, hahn ltd, kessler) and a language selection set to French. A 'New Calendar' field is present, and a calendar widget is displayed. The widget shows a Hijri calendar for the month of Jumada al-Akhirah, 1438, with the 11th day highlighted. The calendar is presented in Arabic with days of the week (ن, ث, ر, خ, ج, ع, ح) and dates (1-28). Navigation arrows are visible at the top of the calendar grid.

Widget Type	جمادى الآخر 1438						
Widget Description	ن	ث	ر	خ	ج	ع	ح
		1	2	3	4	5	6
	7	8	9	10	11	12	13
Desired Sizes	14	15	16	17	18	19	20
	21	22	23	24	25	26	27
Manufacture Date	28	29
