Added Hijri calendar (Arabic) for custom date fields (5.5)

2017-03-13 - Lauren Cumming - [Comments \(0\)](#) - [Product](#)

You can now choose between the option to use a Gregorian or Arabic calendar for custom date fields.

The screenshot shows a user profile configuration interface. At the top, there are fields for 'Agent' (John Doe), 'Team' (None), and 'Followers' (Broderick Mori). Below these are 'Labels' (bartell inc, bayer-o'kon, flatley-bednar, hahn ltd, kessler) and 'Language' (French). The 'New Calendar' field is currently empty. A calendar widget is displayed, showing the Hijri calendar for the month of Jumada al-Akhir (جمادى الآخر) in the year 1438. The widget is a grid with days of the week (ن, ث, ر, خ, ج, ع, ح) and dates (1-14, 17-21, 24-28). The date 11 is highlighted. The widget also shows navigation arrows and the current date (1438). At the bottom of the widget are 'إغلاق' (Close) and 'مسح' (Delete) buttons. The main interface has 'Save' and 'Cancel' buttons at the bottom right.
