

Introducing our new integration with TeamViewer!

2022-12-06 - David Anjonrin-Ohu - Comments (0) - Product (Admin)

We're happy to announce that our latest integration is with the remote access service TeamViewer.

Installing this app gives your team the ability to create new TeamViewer sessions while working on a ticket, saving them from having to leave your Deskpro instance.

The screenshot displays the 'TeamViewer Sessions' interface. At the top, there are two icons: an information icon and a refresh icon with a '1' notification badge. The main title is 'TeamViewer Sessions' with a refresh icon and a menu icon. Below this, there are two sections:

- Active Sessions (1) +**
 - Session ID: **s89-393-283** (with refresh and share icons)
 - Created: 4 Mar 2021 13:34
 - Buttons: Copy Link, Delete
- Expired Sessions (1)**
 - Session ID: **s89-393-283**
 - Duration: 00:02:23
 - Created: 8 Apr 2020 14:40
 - Expired: 24 Apr 2020 17:09

The app also gives you a list of active sessions with a copy button to make it easy to share details of TeamViewer sessions with your users while communicating with them.
